MedAccess Acute Program

Simplifying access to essential acute medications – when it matters most.

Acute conditions demand immediate action. Delays in treatment—due to network restrictions, prior authorizations, or pharmacy access—can lead to complications, ER visits, or even hospitalizations.

Curative's MedAccess – Acute Program eliminates these barriers by providing open pharmacy access for essential, time-sensitive medications—ensuring members get what they need, when they need it.

What's new:

We are expanding pharmacy flexibility for EPO and PPO members by allowing them to fill acute prescriptions at any pharmacy, even if it's outside the standard network.

(Note: PPO Max members already enjoy a broader network and are not impacted by this change.)

Healthcare should be affordable, accessible, and radically simple — so your employees stay healthy, productive, and cared for.

Contact your Curative representative today to learn how MedAccess can enhance your benefits offering.

How it works

No prior authorizations

- No step therapy
- No added costs (All medications are on formulary at Tier 1 pricing)

Open Pharmacy Access

Members can fill targeted acute prescriptions at any pharmacy

Member-Centric Design

- Covers essential acute medications
- Focused on urgent care needs: pain, infections, asthma attacks, anaphylaxis, migraines, and more

Smarter Healthcare Spend

- Prevents ER visits and complications by addressing issues early and effectively
- Reduces downstream costs through proactive intervention

What's Covered?

Over 50 medications across the most critical acute categories (full list available upon request)
